

T LEVELS FOR EMPLOYERS

Highly skilled, work-ready students from across the city of Leeds are here to build your workforce and create opportunities for your organisation, with industry placements to commence in **September 2022**.

WHY HAVE T LEVELS BEEN CREATED?

T Levels give young people the skills and knowledge they need to get a head start towards their future career and support organisations. Industry placements within a chosen specialism are designed to support their interests and career aspirations, so students can get deeper into a chosen subject and build up the skills they need for future employment or Higher Education. Students in Leeds will be undertaking an occupational specialism in supporting health care teams, following either an adult nursing, therapy, or mental health option.

WHAT IS AN INDUSTRY PLACEMENT?

A student will apply to work with you for **45 shifts (315 hours)**, developing skills and building confidence. Placements will commence **September 2022** and will take place on a **Wednesday and Thursday** for **22 weeks**.

HOW WILL THIS BENEFIT MY ORGANISATION?

- Help nurture and develop talent of our future workforce
- Destination routes upon successful completion could be entry level employment and/or higher level apprenticeship
- Upskill your staff with the chance to buddy a young person and provide invaluable knowledge, skills and experience
- Increase capacity and highlight opportunities for our future workforce

T levels are an exciting opportunity for employers to offer the future workforce dedicated industry placements within the Health and Social Care sector across the city of Leeds.
